The Gerontological Society of America
proudly announces the 1994 recipients of
The Glenn Foundation Award

**James R. Smith, PhD**
**Olivia Pereira-Smith, PhD**
Huffington Center on Aging,
Baylor College of Medicine, Houston, Texas

The two researchers won the prestigious award for their contributions to understanding how the proliferation of human cells is controlled. They have identified at least four chromosomes which contain genes that control this process; they have also identified and cloned a gene called *sdi1* which is expressed in senescent cells, but not in young growing cells. The protein made from this gene inhibits DNA replication, thereby preventing cell proliferation. Dr. Smith and Dr. Pereira-Smith will deliver the Glenn Award lecture during GSA's Annual Meeting. This lecture is scheduled for Saturday, November 19 from 2:15 p.m.–4:00 p.m. in the Salon 4 Ballroom of the Atlanta Marriott Marquis in Atlanta, GA.
